REMARKS			
25X1			

On 13 June 1952, 480 workers were employed at Drewitz airfield. The number of employees increased daily. Three graders were available. Spur tracks were being laid, and grading work was being done. Preliminary work started for the construction of a 2.5-meter high wooden fence around the field. The fence posts will be made of concrete except for a strip of 200 meters on both sides of the flying lane. Work is to start on the runway and the southern side of the taxiway. The taxiway is to be 15 meters wide at some places and 20 meters wide at other places. No VP guards were observed at the field on 13 June. *

* ☐ Comment. The report supplements previous information on the airfield northeast of Cottbus which has been under improvement since early May 1952.
